3210 DEADBOLT

FEATURES
Mechanical, keyless deadbolt lock
One user code
Oversized knob on exterior and interior
Reversible handing
Adjustable backset deadbolt
Covers standard 2 1/8” hole
Marine Grade Finish

OPTIONS
Single Combination, Double Combination

DIMENSIONS & SPECIFICATIONS

Dimensions:
Length: 6 1/4”
Width: 1 3/4”
Depth: 2”

Total Coverage with Trim Plates: 6 3/4” L x 2 1/4” W x 2 1/8” D

Door Thickness: 1 1/8” to 2”, up to 5” with Extension Kit

Material: Zinc-plated steel
Teflon coated stainless steel interior components
Teflon coated with Marine Grade Finish

For Exterior & Interior Use
Weather Resistant
Lifetime Mechanical Warranty

The 3210 is only available in Marine Grade finish. The finish closely resembles the color of a Satin Chrome (26D) finish lock. We recommend the Marine Grade Finish for saltwater environments where the lock will sustain consistent exposure to the elements. It has a much longer lifetime than a standard finish and provides added strength against the corrosive elements of coastal/saltwater environments.

EC SERIES USER MODES: PUBLIC, PRIVATE, & RAS

Locks in the Electronic Cabinet and Locker Lock Series are available in three user modes: Public, Private, and Remote Allocation System mode (RAS).

PUBLIC MODE
User code is lost when opened.

Commonly used for locks on shared spaces such as in fitness locker rooms, shared work spaces, festivals and amusement parks.

TO SET IN PUBLIC MODE:
[LOGO] [MASTER CODE] [08]

TO LOCK:
1. Select the open locker, cabinet or drawer.
2. Place items inside and close the door.
3. Enter any four digit code.
4. Re-enter the same four digit code.
5. It is now locked.

TO UNLOCK:
1. Return to the lock.
2. Enter your four digit code on the keypad.
3. The lock is now unlocked.

PRIVATE MODE
User code is retained when opened.

Commonly used for locks on cabinets, lockers, drawers and other applications in non-shared spaces. The lock is assigned to an individual user.

TO SET IN PRIVATE MODE:
[LOGO] [MASTER CODE] [09] [NEW USER CODE]

TO UNLOCK:
1. Enter assigned four digit code.
2. Place items inside.

TO LOCK:
1. Close the door.

The lock automatically re-locks after four seconds and engages when the locker door is closed.

REMOTE ALLOCATION SYSTEM
User code is managed online.

The Remote Allocation System (RAS) is an online code management system available on all keypad locks in the Electronic Cabinet & Locker Series. With RAS, administrators can remotely manage all locks without ever having to go to the lock itself!

Through the online portal, administrators can view a detailed overview of all the locks they currently manage. The lock list provides information such as the serial number, location of the lock and who the lock is currently allocated to.

Change many or all lock codes at once!
1. Select locks to be updated.
2. Click “Manage.”
3. Click “Advance lock codes.”
The next user code is now available!

Administrators can manage a single lock by clicking “Update,” which can be found on the far left side of the lock list. This will allow the administrator to see all details of the lock.

From the lock details page, administrators can manage, amend and update all aspects of the individual lock.

Administrators can advance the lock code, reallocate the lock to a different user, and edit all aspects of the lock details with the Remote Allocation System.

TB100 GATE CLOSER

FEATURES
Gently closes both small and large gates up to 125lbs.
Pushes gate closed
Adjustable closing speed
Can be installed on top, bottom or middle of gate
Recommended for pool, garden and barrier gates
Can be used on lightweight (non fire-rated) doors
Works best on gates with in-line/flush hinges

DIMENSIONS & SPECIFICATIONS

Dimensions:
- Length: 7 1/2"
- Width: 13"
- Depth: 2 1/2"

Mounting Bracket Dimensions: 3 1/4" x 1 3/4"
Max. Gate Weight: 125 lbs.
Max. Gate Width: 54"
Max. Opening Angle: 90 degrees
Min. Operating Temperature: 10 degrees
Max. Operating Temperature: 110 degrees
Type of Gate Material: Vinyl, Wood, Steel, Chain Link
Closing/Latching Method: Hydraulic
Material: Steel
Finish: Powder-Coated
Color: Black
Hinge Arrangements: In-line/flush hinges
Opening Pressure: Variable, depending on gate size

The LockeyUSA Turtle Back TB100 Hydraulic Gate closer must mount on the hinge side/pull side of the gate in order to push the gate closed. The TB100 works best if the gate has in-line/flush hinges flush with the gate post with 1” or less gap.

ORDERING INFORMATION

Order #: TB100

www.LockeyUSA.com/TB100
TB175 GARDEN GATE CLOSER

FEATURES
Flush mount gate closer
Closes gates 50 to 125 lbs. easily and gently
Installs on top/middle/bottom
Works with left and right hand gates
Will work with most in-line hinge arrangements
Mounts on opening side of gate
Pushes the gate closed
Adjustable closing speed
Adjustable latching speed
Hold open feature

OPTIONS
Black, White

DIMENSIONS & SPECIFICATIONS
Dimensions:
Length: 12 1/2”
Width: 2 1/2”
Depth: 2 3/8”
Max. Gate Weight: 125 lbs.
Max. Gate Width: 54”
Max. Opening Angle: 90 degrees
Type of Gate Material: Metal, Vinyl, Wood
Closing/Latching: Adjustable
Material: Steel
Color: Black or White
Finish: Powder coated
Hinge Arrangements: In-line
Opening Pressure: Variable depending on gate size

The TB175 may not be compatible with offset hinge arrangements or arrangements that create more than 2” between gate post and gate, as it is critical to mount the closer as close as possible to the gate’s pivot point.

TB950

www.LockeyUSA.com/TB950
The Remote Allocation System (RAS) is an online code management system available on all keypad locks in the Electronic Cabinet & Locker Series. With RAS, administrators can remotely manage all locks without ever having to go to the lock itself!

Through the online portal, administrators can view a detailed overview of all the locks they currently manage. The lock list provides information such as the serial number, location of the lock and who the lock is currently allocated to.

Administrators can manage a single lock by clicking “Update,” which can be found on the far left side of the lock list. This will allow the administrator to see all details of the lock.

From the lock details page, administrators can manage, amend and update all aspects of the individual lock.

Administrators can advance the lock code, reallocate the lock to a different user, and edit all aspects of the lock details with the Remote Allocation System.

EC SERIES USER MODES: PUBLIC, PRIVATE, & RAS

Locks in the Electronic Cabinet and Locker Lock Series are available in three user modes: Public, Private, and Remote Allocation System mode (RAS).

PUBLIC MODE
User code is lost when opened.

Commonly used for locks on shared spaces such as in fitness locker rooms, shared work spaces, festivals and amusement parks.

TO SET IN PUBLIC MODE:
[LOGO] [MASTER CODE] [08]

TO LOCK:
1. Select the open locker, cabinet or drawer.
2. Place items inside and close the door.
3. Engage lock by turning handle.
4. Enter any four digit code.
5. Re-enter the same four digit code.
6. It is now locked.

TO UNLOCK:
1. Return to the lock.
2. Enter your four digit code on the keypad.
3. Turn handle to disengage.
4. The lock is now unlocked.

PRIVATE MODE
User code is retained when opened.

Commonly used for locks on cabinets, lockers, drawers and other applications in non-shared spaces. The lock is assigned to an individual user.

TO SET IN PRIVATE MODE:
[LOGO] [MASTER CODE] [09] [NEW USER CODE]

TO UNLOCK:
1. Enter assigned four digit code.
2. Turn handle to disengage.
3. Place items inside.

TO LOCK:
1. Close the door.
2. Return handle back to the locked position.

The lock automatically relocks after four seconds and engages when the handle is returned back to the locked position.

REMOTE ALLOCATION SYSTEM
User code is managed online.

The Remote Allocation System (RAS) is an online code management system available on all keypad locks in the Electronic Cabinet & Locker Series. With RAS, administrators can remotely manage all locks without ever having to go to the lock itself!

Administrators can manage a single lock by clicking “Update,” which can be found on the far left side of the lock list. This will allow the administrator to see all details of the lock.

From the lock details page, administrators can manage, amend and update all aspects of the individual lock.

Administrators can advance the lock code, reallocate the lock to a different user, and edit all aspects of the lock details with the Remote Allocation System.
