

# agion®

Powerful Antimicrobial Technology

## Smarter Antimicrobial Technology

Agion® Antimicrobial utilizes a unique zeolite and ion exchange process to deliver highly efficient antimicrobial performance. Agion reaches an optimal level of silver to effectively resist the growth of odor-causing bacteria, then stops releasing resulting in unmatched durability.

Alternative, uncontrolled antimicrobial technologies fail to maintain an optimal level of silver, resulting in poor durability and inconsistent performance.

### With Agion® Less Is More

- **LESS ODOR** – Powerful, lasting odor control
- **LESS COST** – Save money, improve durability
- **LESS HASSLE** – Worry-free transition
- **LESS WASTE** – Only releases when needed

Powerful Antimicrobial Technology

## Smarter Technology. Superior Service.

- Up to 100+ wash durability
- Unique controlled release for lasting performance
- Customizable to meet performance and cost goals
- Applied via padding, exhaust or package yarn
- Works on a wide range of fabrics and materials
- EPA Registered
- bluesign approved

### Our Guarantee

We guarantee our global support team will provide unrivaled technical and customer support at every level of your organization, ensuring a worry-free transition.
